ABOUT ME

Informatics student with an interest in web development, databases, machine learning, and technology. Experienced in academic projects involving programming, data processing, and system development. Interested in software development and continuously improving technical skills through projects and self-directed learning.

PROJECT EXPERIENCE

Cyber Billing System | 2026

Web Development Project

- Developed a web-based billing system for managing computers and users.
- Used PHP, MySQL, Bootstrap, and XAMPP.
- Implemented data management and billing process features.

Retail Sales Analytics | 2026

Big Data / Data Warehouse Project

- Developed a Business Intelligence dashboard for retail sales analysis.
- Used Python, SQL, MySQL, and a Data Warehouse approach.
- Presented analysis results through interactive data visualizations.

Image Classification | 2026

Machine Learning Project

- Developed an image classification project using Machine Learning and Deep Learning approaches.
- Used Python, HOG, SVM, and CNN.
- Performed preprocessing, feature extraction, model training, and performance evaluation.

ADDITIONAL INFORMATION

Open to freelance and part-time opportunities in frontend, backend, and full-stack web development.
